Ashesh Singh

AI Automation Engineer

+91-9140382381 — ashesh.bytes@gmail.com — LinkedIn — GitHub — LeetCode — Portfolio

Summary

Computer Science graduate and Oracle-certified Generative AI professional with 5 months of internship experience. Strong in Python, REST API design and integration, OAuth/JWT authentication, and event-driven backends. Seeking an AI Automation Engineer role to build LLM-powered workflows and API-driven automations that remove repetitive manual work.

Skills

AI & Automation: Generative AI, LLM Fundamentals, Prompt Engineering, RAG Concepts, Workflow Automation, API Integration, Webhooks, Event-Driven Design, Google Drive API
Programming & Cloud: Python, JavaScript, Java, C++, SQL, AWS (boto3), Terraform, Bash Scripting
Web & Data: Node.js, Express.js, RESTful APIs, JSON, Socket.io, JWT, MongoDB, MySQL, PostgreSQL, React, Next.js, Tailwind CSS
Tools: Git, GitHub, Postman, Cloudinary, Netlify, Vercel, Render, CI/CD, Agile

Experience

Full-Stack Developer Intern **Mar 2025 – Aug 2025**
Skylark Edge · Remote *React, Node.js, JavaScript, MongoDB, MySQL*

- Designed and integrated RESTful APIs with MongoDB and MySQL backends, automating content updates and cutting update time by **40%**.
- Built and deployed a complete business website for a client, driving a **30% increase** in online engagement and generating **15+ monthly leads**.
- Optimized React rendering, cutting page load time by **25%**; supported QA and deployment, improving inquiry response time by **20%**.

Projects

Cloud FinOps Optimizer | GitHub **2026**
Python, boto3, pydantic, Terraform, Jinja2, pytest

- Built a Python tool that scans AWS for idle, orphaned, and underutilized resources across EC2, EBS, RDS, Elastic IPs, and S3, and estimates monthly and annual waste per finding.
- Classified every finding as LOW, MEDIUM, or HIGH risk and auto-generated Bash remediation scripts with pre-deletion snapshots and Terraform HCL for review before any change.
- Designed dual modes: a credential-free mock sandbox for safe demos and a live AWS mode via boto3; produced an HTML audit report and terminal dashboard (Rich), with a pytest suite.

Lead Finder & Agency CRM | GitHub **2026**
React 19, Vite, Node.js, Express.js, Google Places/Serper API, ExcelJS

- Built a tool that scans Google Maps via Serper and Google Places APIs, filters out businesses that already have a website, and cleans phone data to produce outreach-ready lead lists.
- Developed a 0–100 deal-scoring engine (rating, reviews, verified mobile) ranking leads as Hot, Warm, or Starter.
- Automated outreach with one-click WhatsApp pitches from templates, a daily send-limit counter, and a 5-stage drag-and-drop Kanban CRM with call logs and notes.
- Added Excel/CSV export (ExcelJS) and a live storefront mockup generator to demo to prospects.

Drive Batch Downloader | GitHub **2026**
Python, Google Drive API v3, OAuth 2.0, pdf2docx, pywin32, JavaScript

- Built a Python pipeline that batch-searches Google Drive (incl. Shared Drives) via Drive API v3 and OAuth 2.0, downloads PDFs, and converts them to DOCX (pdf2docx) and HTML (Word COM).
- Made runs idempotent by skipping processed IDs; added hung-process cleanup with retries and failure logging for auditing.

Certifications

- **Generative AI Professional** – Oracle · **Full Stack Web Development** – Udemy · **React JS Expert** – Udemy (2025)

Education

B.Tech in Computer Science and Engineering **2022 – 2026**
Galgotias College of Engineering and Technology, Greater Noida, Uttar Pradesh
